Before 2012	**PHP Programmer**, *4Stones s.r.o, Firis s.r.o, Inventive Designs, ePortaly.cz*, Praha. I was programming various websites, including eshops.

Languages

Czech	**Native speaker**
English	**Intermediate** *I use English every day at my work. Mostly while reading documentation and IT articles but sometmes also on meetings and conference calls.*

Programming skills

Languages

Java	Oracle Certified Professional and i use Java on daily basis.
Groovy	Groovy is my first choice when it comes to unit tests.
SQL	I am not professional but i use SQL on daily basis.
PHP, Ruby, Python	I have written websites, tools and various programs using theese languages.
C++	Only occasional usage

Tools, Frameworks

Spring	I am building most of the java project using spring, spring mvc and other spring frmaeworks.
Hibernate, JPA	I am using JPA as an interface and hibernate as an orm engine on almost all projects.

JSF, Primefaces	I am not a big fan of this projects but i used it on two projects and gained a lot of experience with them.
Build tools	Maven, Gradle

Testing frameworks	Junit, EasyMock

Metodologies

Scrum	My favorite metodology. Most of project i did was developed using this metodology.
Kanban	Used on two projects so far.
eXtreme programming	I do not stick to all of XP points but to most of them. For example Continuos integration, Test driven development, agility and customer interaction.

Others

Linux	I am user and big fan of gnu/linux systems.
Servers	Tomcat, Apache, MySQL, Postgres

Project references

HitHit	www.hihit.com - crowd-funding server. I was responsible for development of payment system.
Orinoco	Internal software of AspectWorks. It is software for managing company processes (BPM).
Jablotron Kruh	Software for security cars management for company Jablotron.
DHL Configuration center	Configuration center of the DHL integration framework.
DHL eBilling	Software for invoicing and integration with customers.

Interests

Programming, Cycling, Weight lifting, Fitness, Tourism, Economics, Politics

Desired job description

Team	I want to work in a team, not on solo projects.
Passion	I don't like it to be just work. I want a job i enjoy and team that does too.
Interesting projects	Projects i will work on have to be interesting in the way i will learn something new while working on them.
Education	In new job i want to sharpen my existing skills and acquire new ones not only in software development but in business, consulting, etc.
Modern technologies	I want to work with modern technologies. Not on 10 years old versions of software.
Growth	As my skills and expertise will grow i expect my position in company will grow.
